What does eb2b solve for?

- Big Y

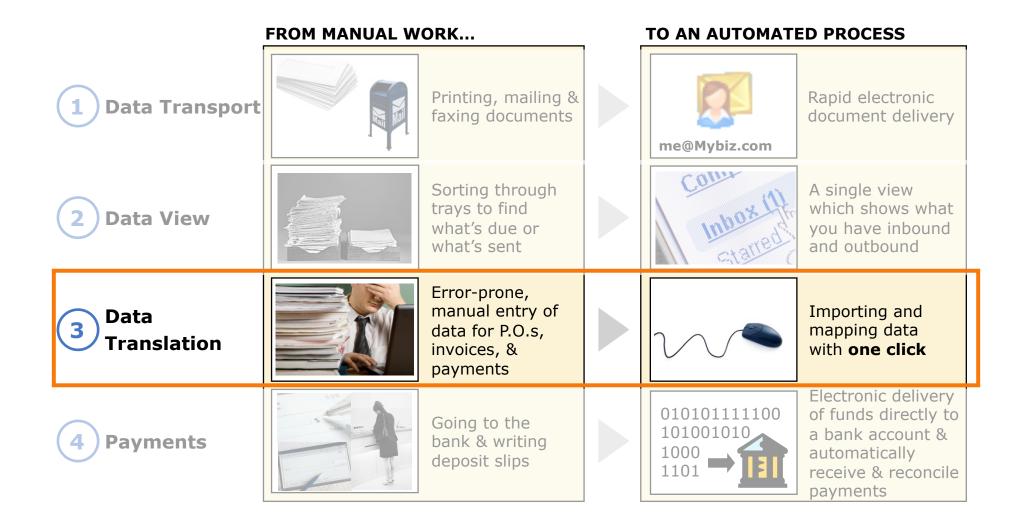

Reduce the <u>time</u> customers spend transacting with business partners by creating a delightfully <u>easy</u> and <u>inexpensive</u> alternative to current solutions.

Key Goals

Minimize user data entryAutomated handling of business transactionsDrive attach to IMS payments and other services

... eventually leading to information exchange via a social network which increases customer productivity and confidence

Where to focus innovation and where to take advantage of existing solutions

Getting from data sent to data in QuickBooks

Data Translation Steps

	Reading the Data	Identify the Data	Parse and Map Data	User review and correction	Learn from errors and add to knowledge	Put the data into QuickBook s
<u>Description</u>	 Getting data in to be parsed 	 Identifying the type of data, which form it is, and who it's from 	 Apply right heuristics, rules or templates Map data, items, accounts, etc. 	 User checks for accuracy and makes any corrections 	 Add new rules or templates Local memorization + User contribution 	 Save the accurate, corrected data into QuickBooks
<u>Example</u>	 Sent data Scan Browse Drag & Drop Poll e-mail and pull text/ attached files 	• Word document Invoice from Rock Castle Construction	 Total is in the lower right, map the nearest number to "Amount Due" 	 Due Date is wrong – user manually maps to upper left corner 	 Remember "Due Date" for Word Invoice from Rock Castle is in upper left 	

User has just imported an invoice
